## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-10, in Paper No. 8 is acknowledged.
2. Claims 11-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed.

Art Unit: 1713

Cir. 1999). The term "C<sub>1</sub>-C<sub>18</sub>-(meth)acrylic acid ester" in claim 1, from which each of claims 2-10 depend, renders the claims indefinite since there are no such things as C<sub>1</sub>, C<sub>2</sub> or C<sub>3</sub> (meth)acrylic acid esters. The minimum number of carbons a (meth)acrylic acid ester can have, if it's an alkyl ester, is 4. It is unclear which esters applicant is intending to encompass in these claims.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 2454397.

The abstract of DE 2454397 teaches a cationic aqueous polymer dispersion prepared by polymerizing a monomer mixture comprising styrene and other nonionic monomers, not requiring any ionic monomer, in the presence of a polymer solution prepared from 70 to 90% of styrene and 10 to 30 of a tertiary (meth)acrylic or meth(acrylamide monomer.

Thus, the requirements for rejection under 35 U.S.C. 102(b) are met.
